## CHANGE ON THE OIL LEVEL INDICATOR ON THE INSTRUMENT PANEL

- Engine:     **xxx**
- Gearbox:    **xxx**

The oil level indicator on the instrument panel has changed:

- If the oil level is sufficient (between the minimum and maximum levels) when the ignition is switched on, the instrument panel displays **oil ok** for **30 seconds**  
The indication of the level by **squares** is displayed by pressing briefly on the trip meter reset button. The **squares** are replaced by **dashes** when the level drops.

- If the oil level is insufficient when the ignition is switched on, the **Service** warning light and the **oil** display light up on the instrument panel and a series of **dashes** flash.

Operation of **Driving Assistance** remains the same as on the current instrument panel.

"The repair methods given by the manufacturer in this document are based on the technical specifications current when it was prepared.

The methods may be modified as a result of changes introduced by the manufacturer in the production of the various component units and accessories from which his vehicles are constructed."
