Repair manual **337**

This note deals with the special features of standardising headlights for the Clio II manufactured in Turkey or Brazil.

"The repair methods given by the manufacturer in this document are based on the technical specifications current when it was prepared.

The methods may be modified as a result of changes introduced by the manufacturer in the production of the various component units and accessories from which his vehicles are constructed."

The "Europe" type headlights are provided with a clamp (A) which allows the radiator grille to be fitted,

and a clamp (B) which is used for fitting in the factory.

In order to standardise headlights sold for replacement, only "Europe" type headlights will be available at the Spare parts stores.

To fit these headlights on the vehicles manufactured in Turkey and in Brazil, it is vital to cut the clamp (A) using a metal saw, and the clamp (B) using a cutting clip.
