Front seatback frame: Removal - Refitting

75A

Essential equipment

diagnostic tool

Tightening torques

front seatback frame nuts	46 N.m
---------------------------	--------

IMPORTANT

To avoid any risk of damaging the systems, apply the safety and cleanliness instructions and operation recommendations before carrying out the repair (see **Airbag and Pretensioners: Precautions for repair**) (88C, Airbag and pretensioners).

IMPORTANT

To avoid any risk of triggering when working on or near a pyrotechnic component (airbags or pretensioners), lock the airbag computer using the diagnostic tool.

When this function is activated, all the trigger lines are inhibited and the airbag warning light on the instrument panel lights up continuously (ignition on).

IMPORTANT

Never handle the pyrotechnic systems (pretensioners or airbags) near to a source of heat or naked flame - they may be triggered.

REMOVAL

I - REMOVAL PREPARATION OPERATION

- ❑ Lock the airbag computer using the **diagnostic tool** (see **Fault finding - Replacement of components**) (88C, Airbag and pretensioners).
- ❑ Disconnect the battery (see **Battery: Removal - Refitting**) (80A, Battery).

II - OPERATION FOR REMOVAL OF PART CONCERNED

❑ Remove:

- the front seatback frame nuts (1) ,
- the front seatback frame.

REFITTING

I - REFITTING OPERATION FOR PART CONCERNED

- ❑ Refit the front seatback frame.
- ❑ Torque tighten the **front seatback frame nuts (46 N.m) (1)** .

II - FINAL OPERATION

- ❑ Connect the battery (see **Battery: Removal - Refitting**) (80A, Battery).
- ❑ Unlock the airbag computer using the **diagnostic tool** (see **Fault finding - Replacement of components**) (88C, Airbag and pretensioners).
