REMOVAL

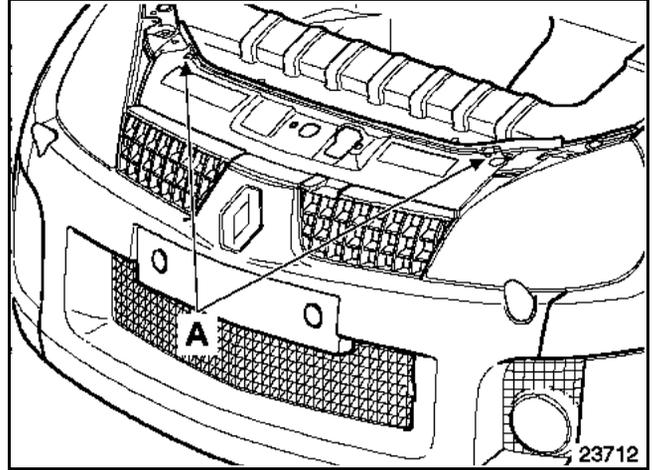

Place the vehicle on a lift.

Remove the front wheels.

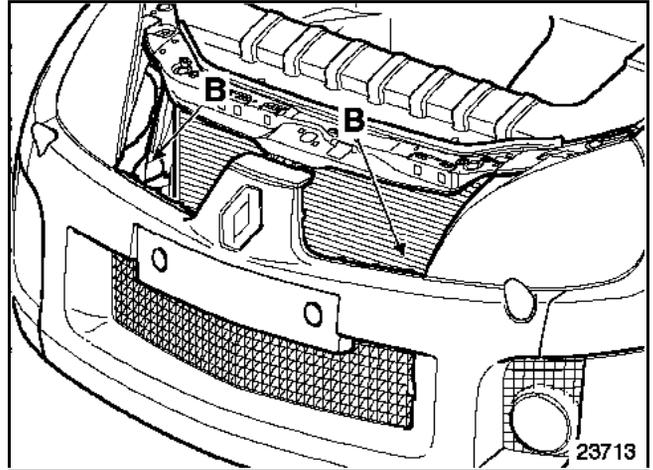

Remove:

- the clips using the unclipping tool,
- the front wing wheel mud guards,
- the storage compartment.

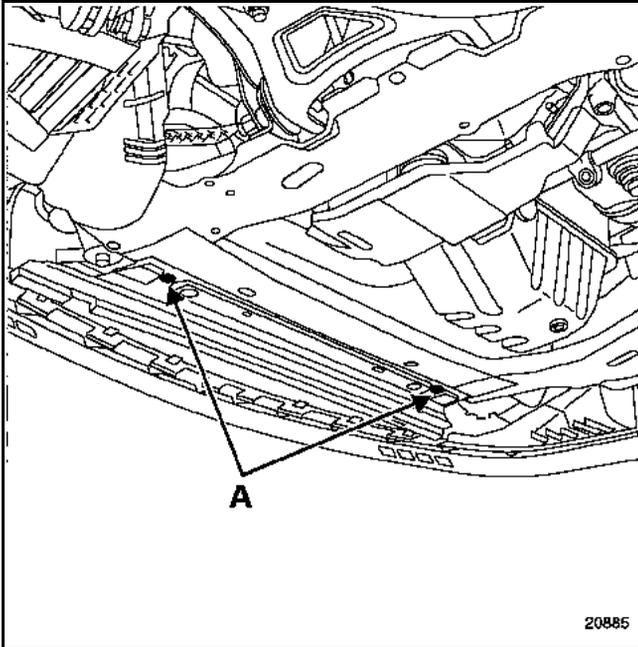

Unclip:

- the two plastic rivets (A),
- the bumper radiator grille.

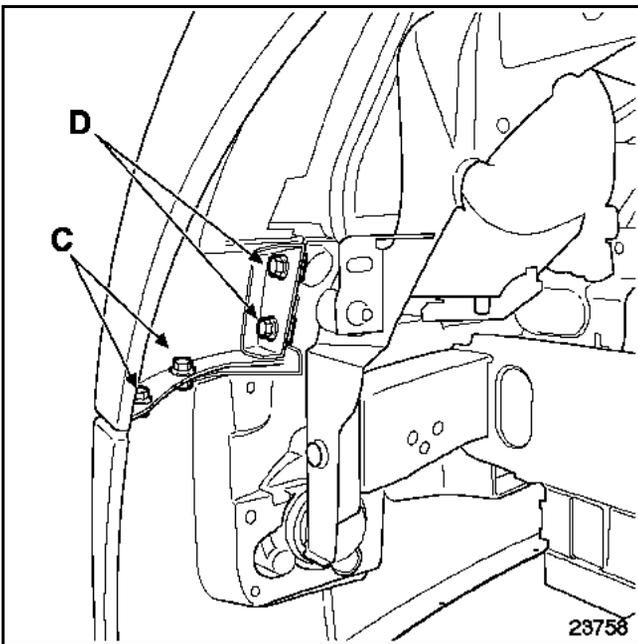

Remove the two bolts (B).

20885

Remove lower bolts (A).

23758

Remove side bolts (C) and (D).

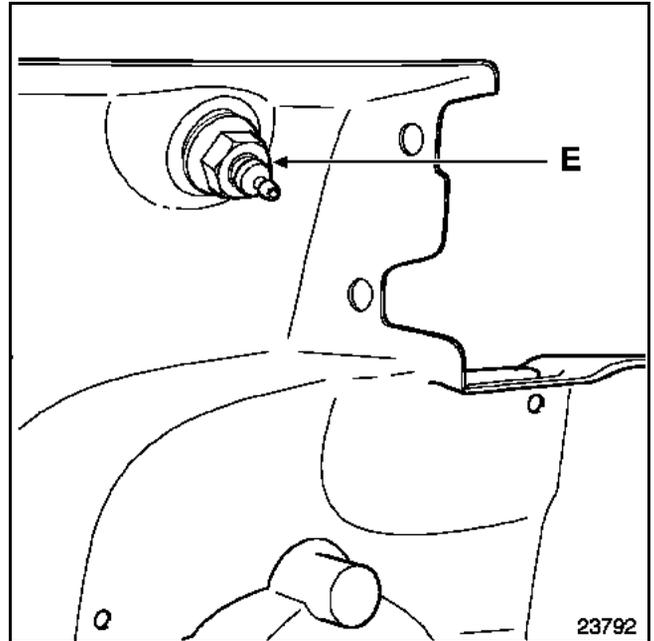

Partially detach the bumper. This operation requires two people.

Disconnect:

- the headlight washer pipes,
- the fog lights.

Release the bumper.

Remove the headlight washer jets

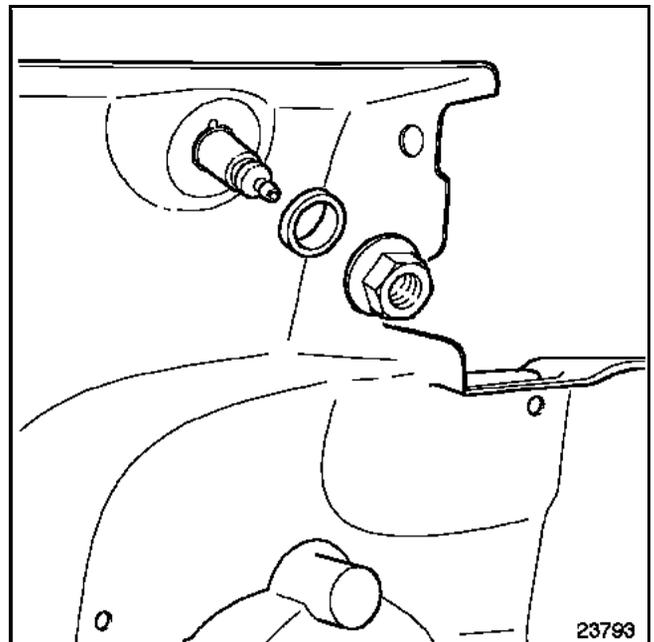

23792

Remove nut (E).

Release:

- the disc,
- the jet.

Refitting the headlight washer jets

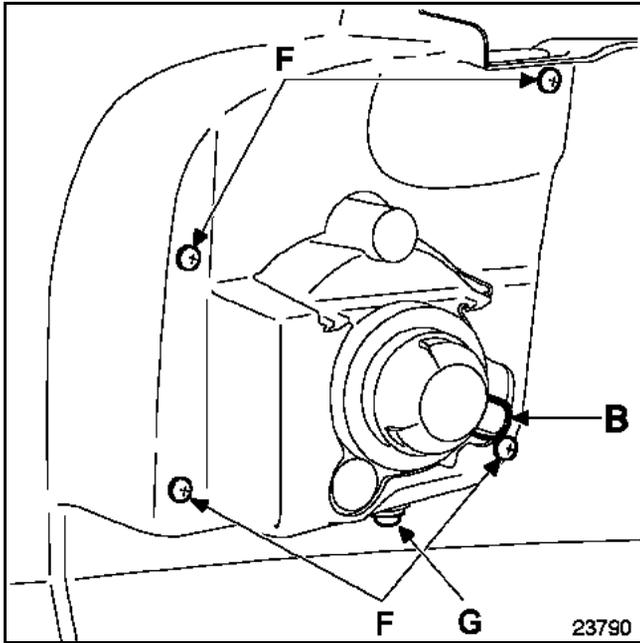

23793

Position the jet and the disc correctly.

Tighten the nut slightly.

Removing the fog lights

Remove:
– the screws (F),
– screw (G).

Release the grille / fog light assembly.

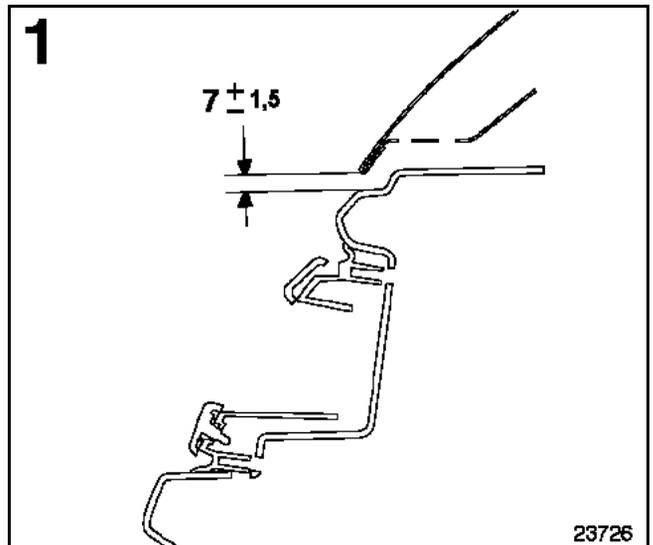

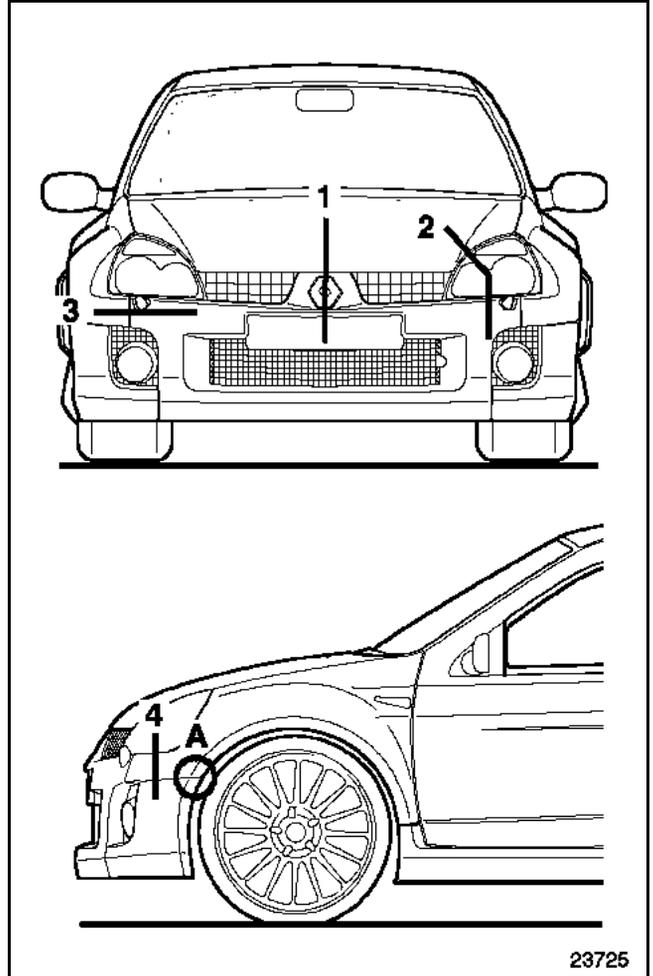

Refitting the fog lights

Proceed in the reverse order to removal.

REFITTING THE BUMPER

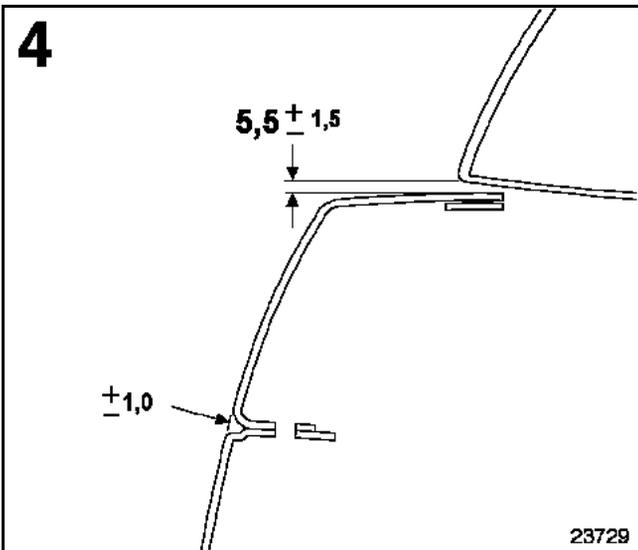

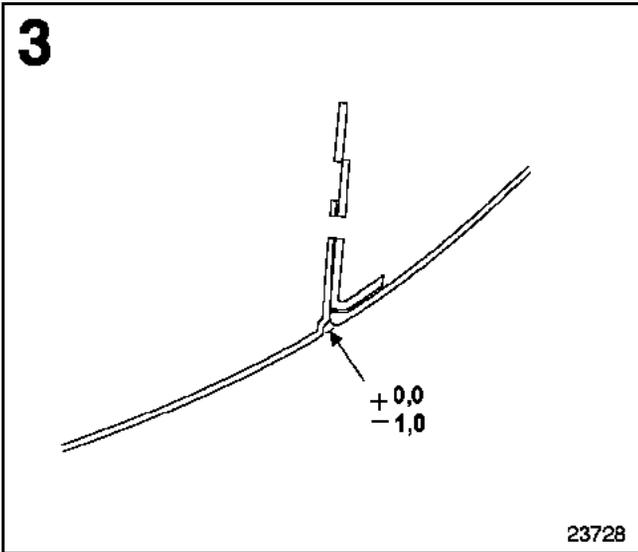

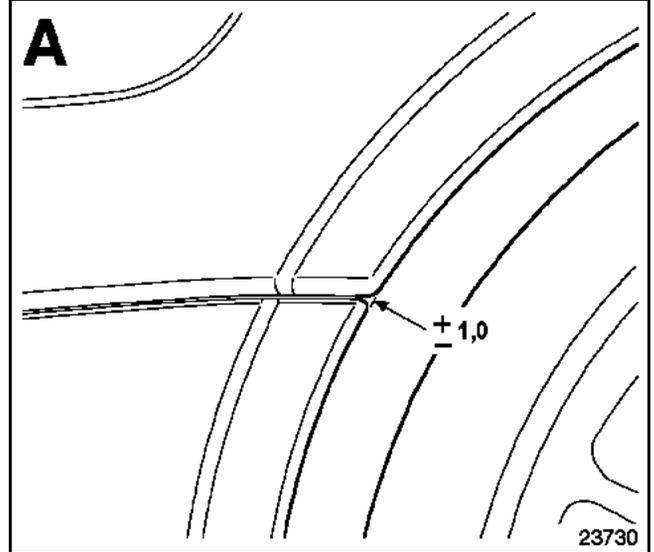

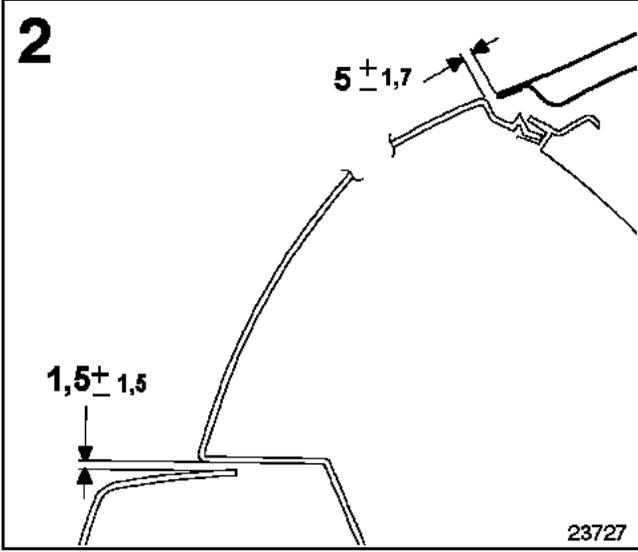

Proceed in the reverse order to removal.

REMOVAL

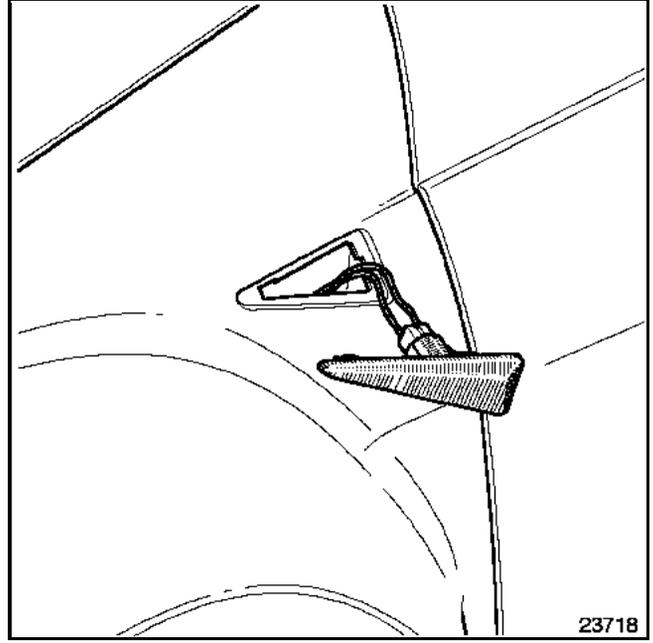

Place the vehicle on a lift.

Remove the front wheel.

Remove:

- the clips using the unclipping tool,
- the front wing mud guards.

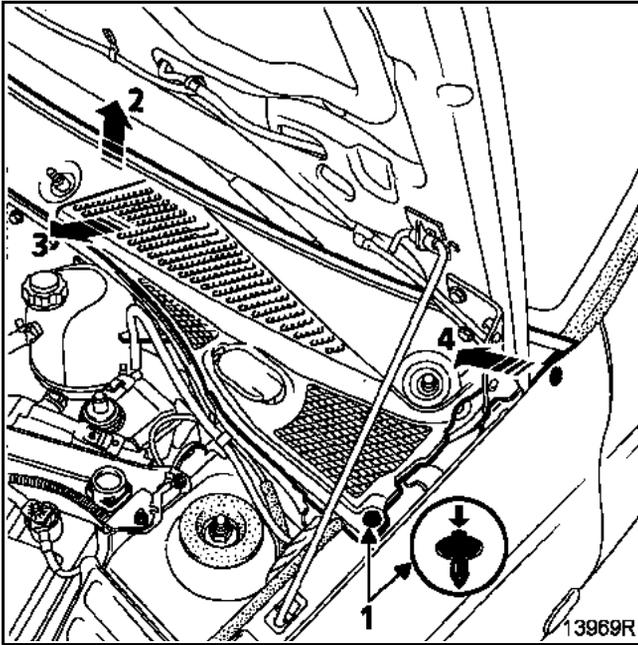

Unclip the side mounted indicator repeater.

Disconnect the connector.

Removing the left-hand scuttle half-grille

Remove the windscreen wiper arms.

Press the shaft in the centre of the rivet (1) and lower it by **5 mm** maximum, using a **T10** or **T20** torx screwdriver.

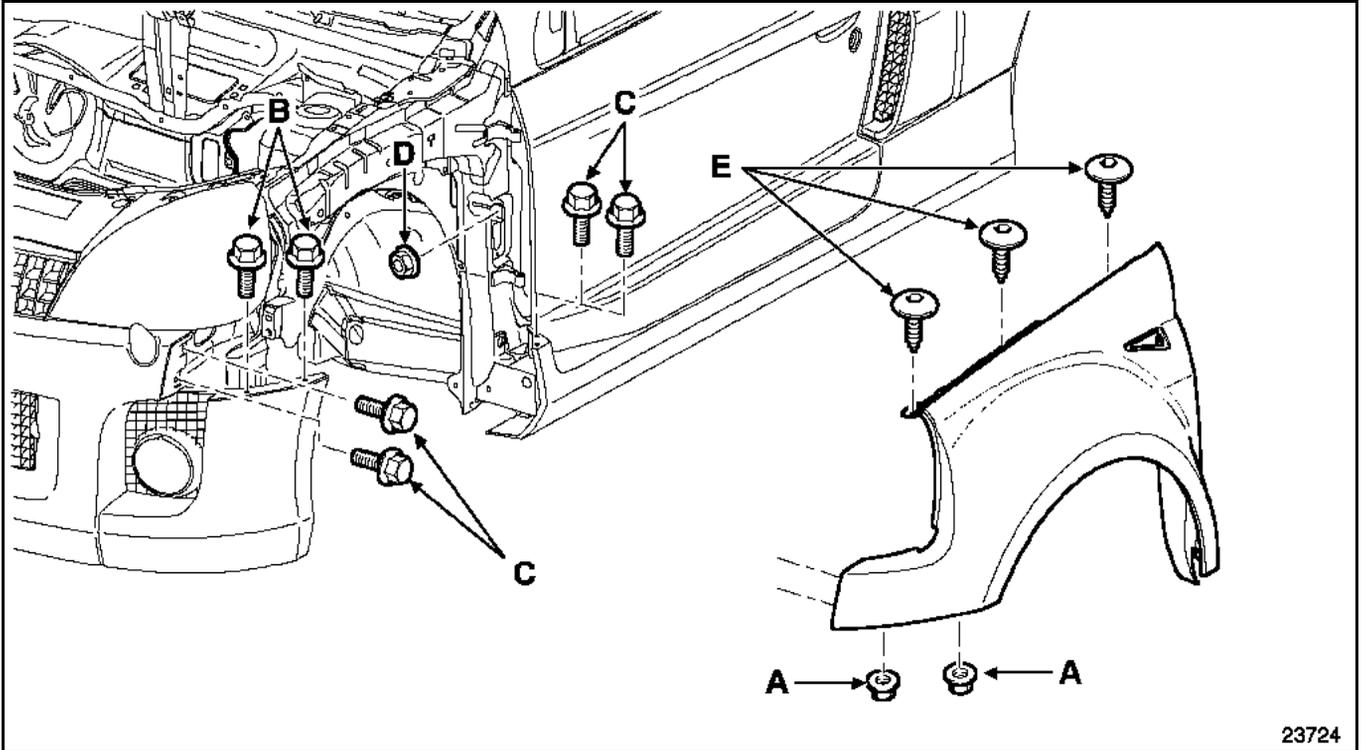

Remove the plastic rivet from the scuttle panel grille.

Unclip the scuttle panel grille (2).

Release:

- the grille retaining clips located under the windscreen aperture cross member (3),
- the grille positioning pin located in the splash panel (4).

Repeat the operation for the removal of the right-hand scuttle half-grille.

23724

Remove:

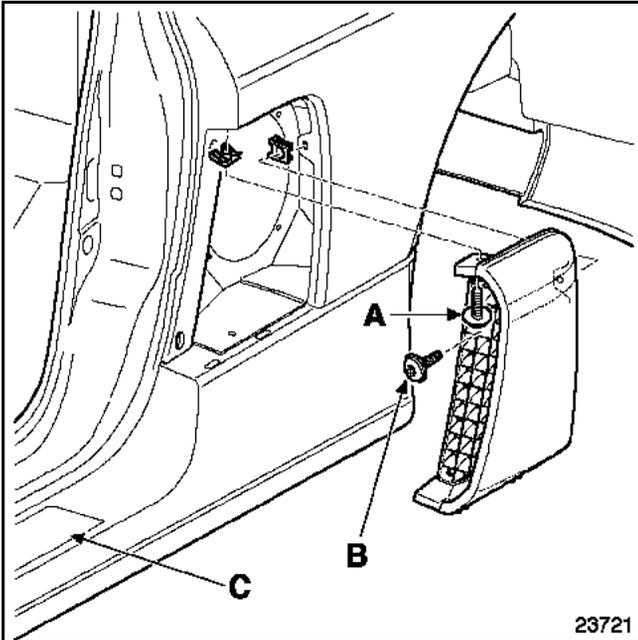

- nuts (A) and release bolts (B),
- the bolts (C),
- nut (D),
- screws (E),
- the wing.

REFITTING

Proceed in the reverse order to removal.

REMOVAL

Removing the air intake panel

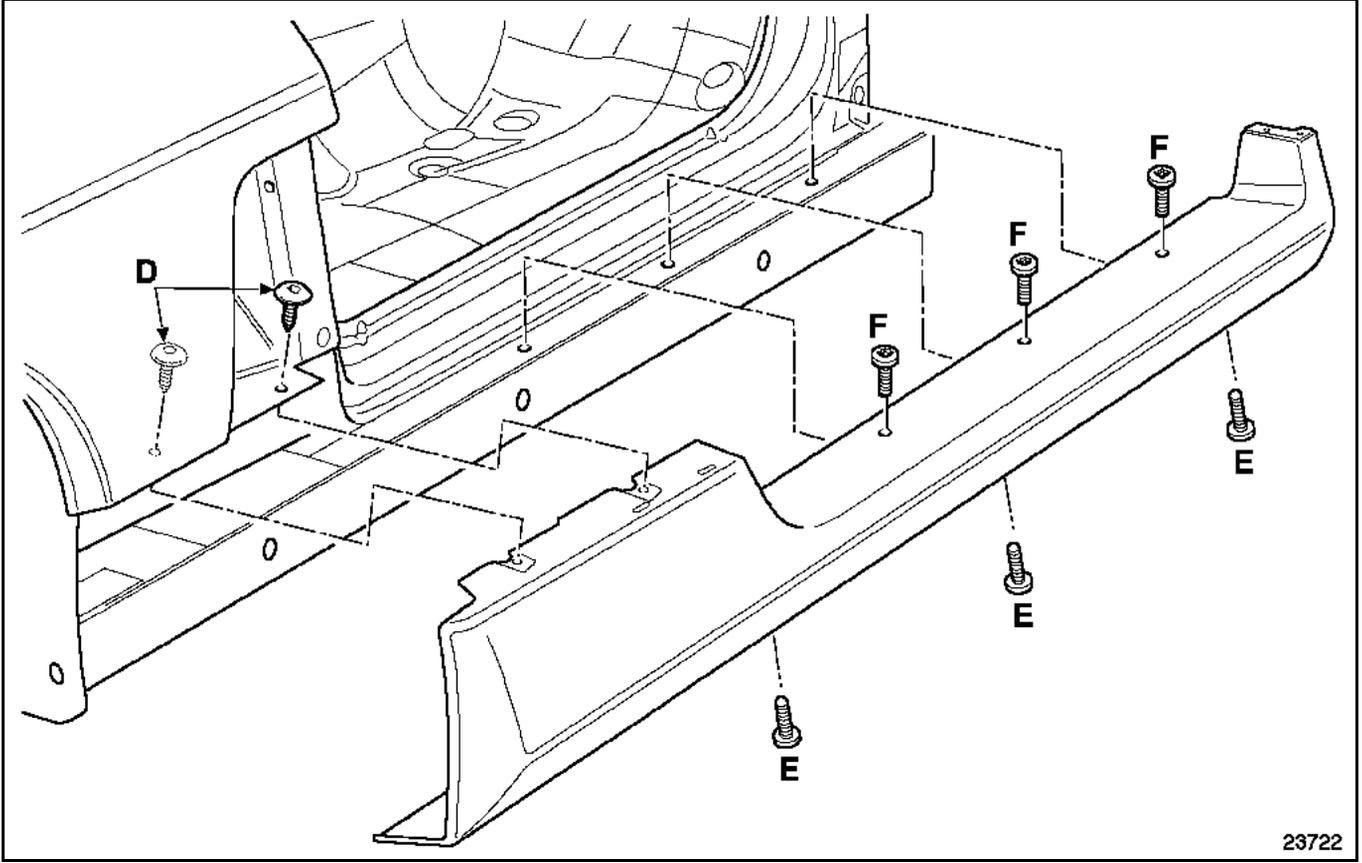

Remove screw (A).

Slacken screw (B) through the grille.

Release the upper section of the air intake panel.

Remove the air intake panel.

Detach the door entry protective strip.

Remove:

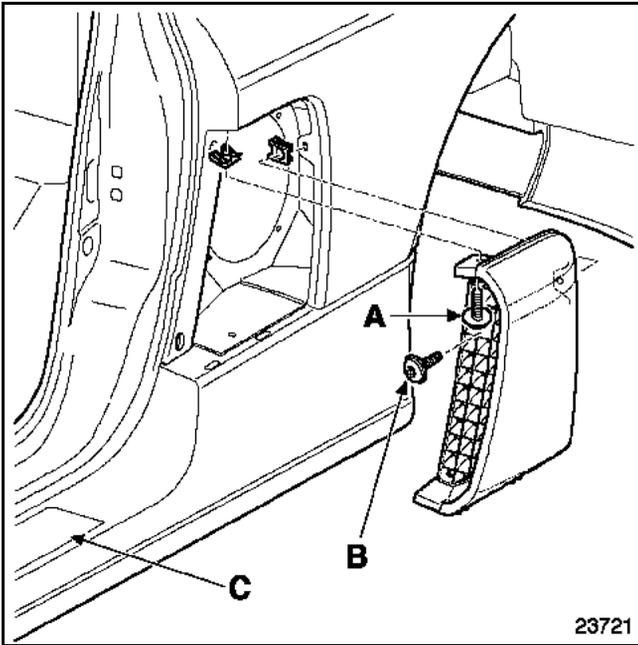

- the bolts (D),
- screws (E) and (F).

Release the side skirt.

REFITTING

Proceed in the reverse order to removal.

REMOVAL

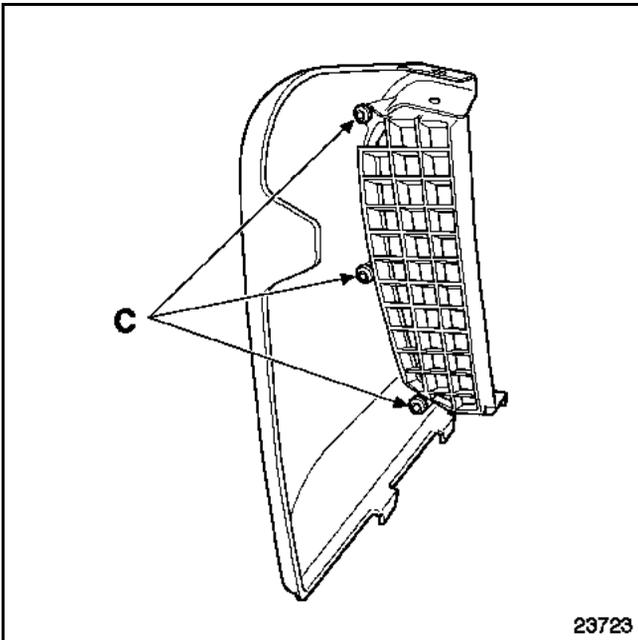

Remove screw (A).

Slacken screw (B) through the grille.

Release the upper section of the air intake panel.

Remove the air intake panel.

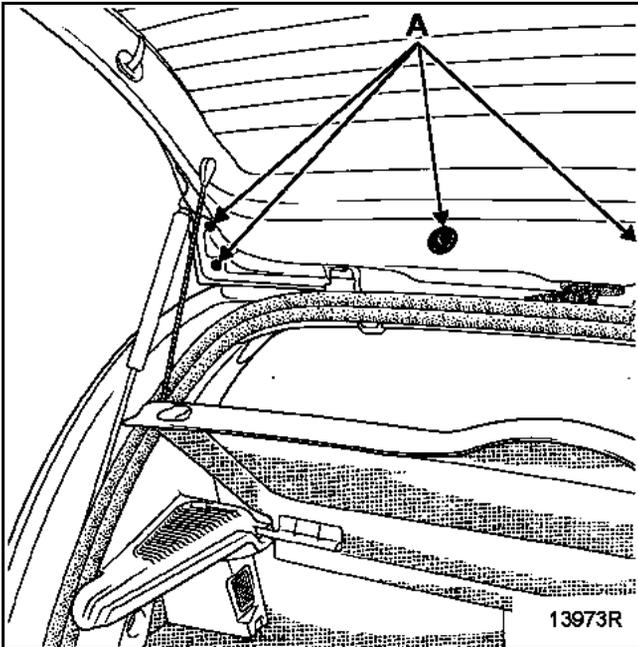

Remove screws (C) and release the grille.

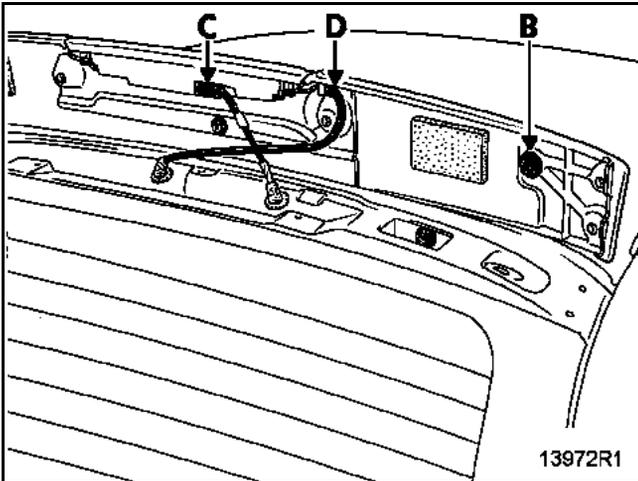

REFITTING

Proceed in the reverse order to removal.

REMOVAL

Remove mounting bolts (A) from the tailgate spoiler.

Unclip spoiler (B) by pulling it upwards.

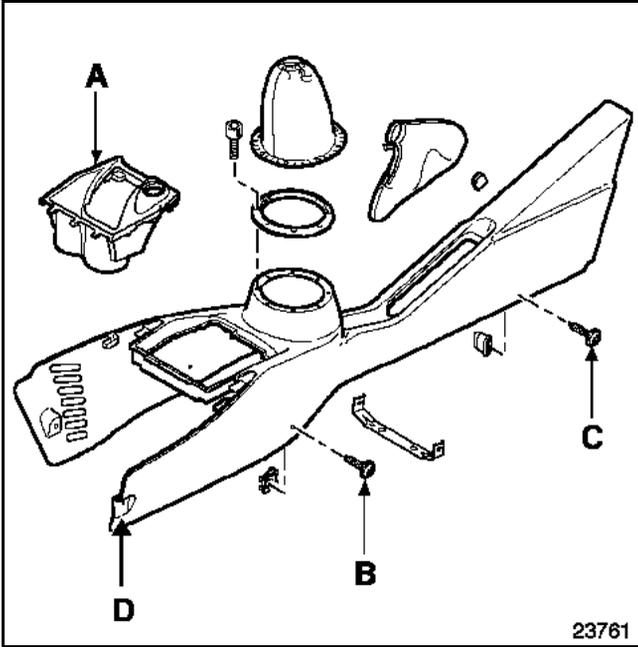

Disconnect the high-level brake light (C).

Detach the supply pipe from the rear screen washer jet (D).

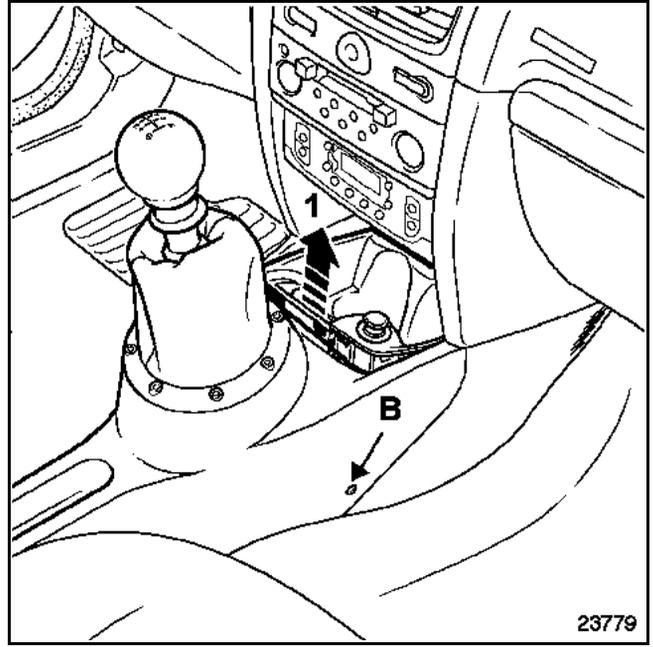

REFITTING

Replace the clips if necessary.

Proceed in the reverse order to removal.

23761

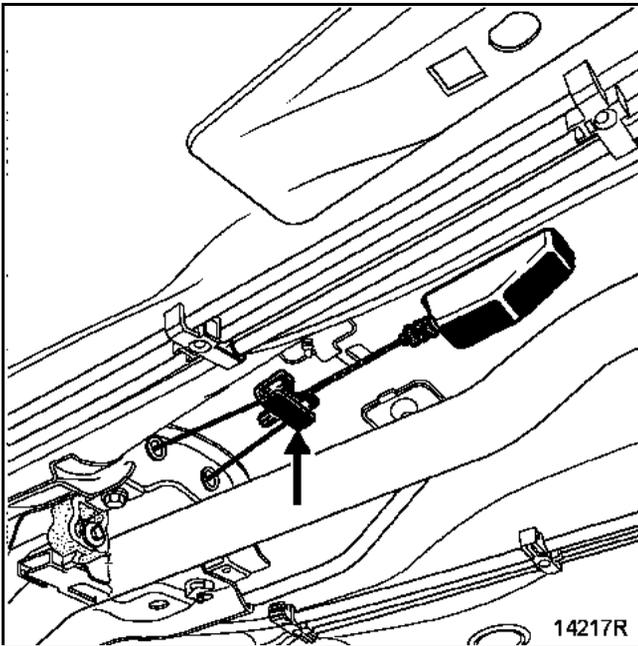

23779

REMOVAL

Release the handbrake mechanism (see **Section 37**); to do this:

Release the handbrake.

Lift the vehicle and remove the exhaust pipe heat shield (four bolts).

14217R

Free both cables at the lever to release the console at the handbrake lever.

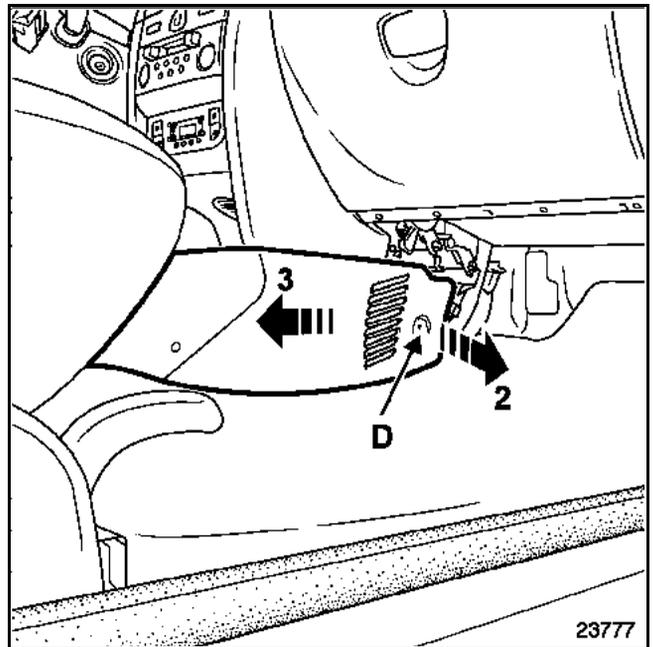

Unclip the ashtray and its holder (1).

Disconnect the cigarette lighter connector.

Unscrew the gear lever knob.

Remove:

- screws (B) at the front of the console.
- screws (C) at the rear of the console.

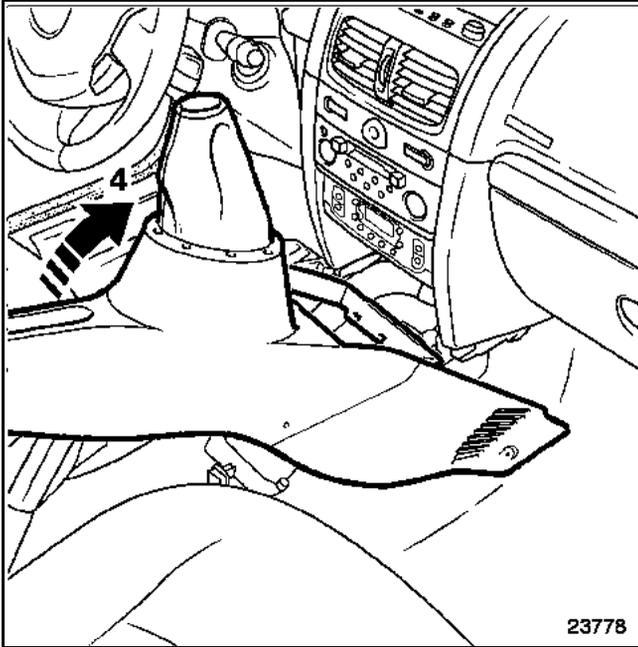

23777

Remove clips (D).

Release the console (2) and (3).

Pull the handbrake up as far as it will go to release the console.

Release the console (4) at the gear lever and handbrake gaiters.

REFITTING

Proceed in the reverse order to removal.
