PROCEDURE FOR LOCKING THE PASSENGER AIR BAG

- Engine: **XXX**
- Gearbox: **XXX**

Basic manual:
Technical Note **3326A**

The time required for locking the passenger air bag using the diagnostic tool on Twingo, Clio and Mégane is **1.6 hours** (Operation Time). This time includes:

- _ locking the air bag computer using the diagnostic tool,
- _ replacing the labels,
- _ disconnecting the passenger air bag module (or removal for the Mégane),
- _ replacing the seat belt,
- _ administration,
- _ checking that the system operates correctly.

The code to use for invoicing for this operation is:

8279 G0. Disconnection of the passenger front air bag

REMINDER: this procedure cannot be reversed. No air bag can be reused once it has been locked.
